Happy Birthday

Purpose

To test the ability to perform input and output operations and manipulate Strings

Directions

Write a program to prompt the user for their birth date and pull out the individual components (i.e. day, month, year).

Examples

```
When were you born? (use the form 1 January 1970): 10 October 2001
Day: 10
Month: October
Year: 2001
```
